

Questions to Answer

1. What was the date & time your team met?

12th July 2024 / 8 PM (GMT +3)

2. What is your team group name?

AfriHealth Innovators

3. What is your team's agreed-upon problem statement? It should be related to a GCGO, clear, well defined, including listing the population affected and addressable using technology.

*Remember, it should be several sentences long, similar to the example provided in your **First Team Meeting Agenda**.*

The problem statement:

In the Sahel region of Sub-Saharan Africa, nomadic pastoralist communities, particularly women and children, face severe challenges in accessing essential maternal and child healthcare services due to their mobile lifestyle, remoteness, and cultural barriers. This lack of access results in high rates of maternal and infant mortality, preventable diseases, and malnutrition, perpetuating a cycle of poverty and vulnerability.

Without accessible and reliable healthcare services, women and children within these communities struggle to receive necessary medical attention, leading to preventable health issues and exacerbating existing inequalities.

The problem disproportionately affects women and children in nomadic pastoralist communities, who face unique obstacles due to their transient lifestyle, limited healthcare infrastructure, and cultural practices that may hinder access to medical care.

Addressing this issue requires the development of a comprehensive mobile health platform that connects these communities with essential maternal and child healthcare services. A successful solution will involve mobile health clinics, culturally sensitive healthcare providers, and community engagement to build trust and address barriers to access, ensuring equitable healthcare delivery and improving health outcomes for women and children in the Sahel region.

4. Share all your team roles, both primary and backup. Write the peer's name and the role(s) they are filling next to it. For example: *Josephine Oware - Project Manager (primary); Data Analyst (backup)*. Each team has 4 - 6 people and you must write at the very least 4 names and 4 team roles. But if for any reason you end up with fewer people, you can still write at least 4 roles (2 primary and 2 backup for each person.)

- 1.Zinzile Mhlanga - Project Manager/Product Manager
2. Mitchell Ngarandi - Product Manager/ UX designer.
3. Christina Tawfiq - UX Researcher/ UI&UX Designer
4. Tapiwa Setimela - Data Analyst/ UX Designer

5. What is the scheduled date and time of your Week 5 team meeting?

Wednesday 17 July 2024 at 8pm GMT+3

6. Share 2 data visualizations that are relevant to your team's problem statement and align with the team's goals and priorities. These are 2 of the top 3 visualizations that your team selected and agreed upon during **this second online group activity**.

Data visualization

Chart 1 (Line chart)

Based on the data presented in the table below, a line graph has been constructed to visually represent the distances healthcare workers travel from villages to Health Centers within the Dori Health District, Burkina Faso. This graph serves as an illustration highlighting the considerable challenges associated with accessing essential healthcare services in the SAHEL region. These challenges stem from the mobile lifestyle of healthcare providers, geographical remoteness, and cultural barriers, all of which contribute to the complexities faced in delivering and receiving healthcare in the region.

TABLE 3.

Distance Traveled by Community Health Workers From Village to Health Center, Dori Health District, Burkina Faso

Distance, km	No. (%)
0	8 (25.8)
5	7 (22.6)
6	1 (3.2)
8	5 (16.1)
15	1 (3.2)
18	2 (6.5)
20	2 (6.5)
25	1 (3.2)
27	3 (9.7)
45	1 (3.2)
Total	31 (100.0)

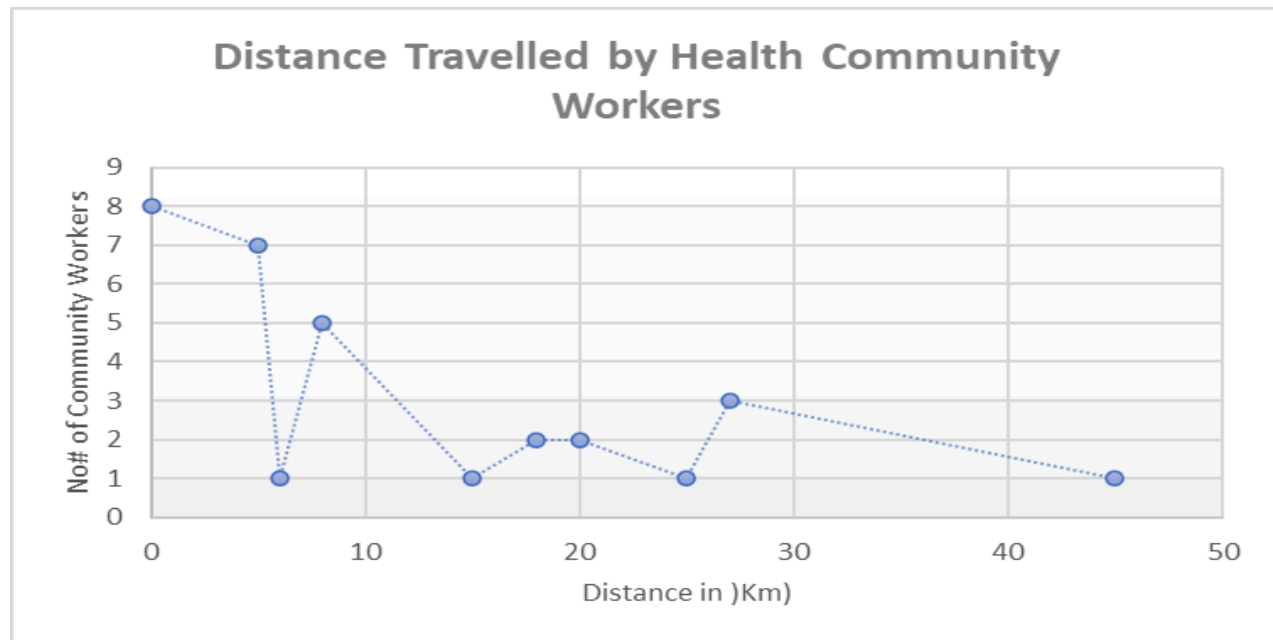

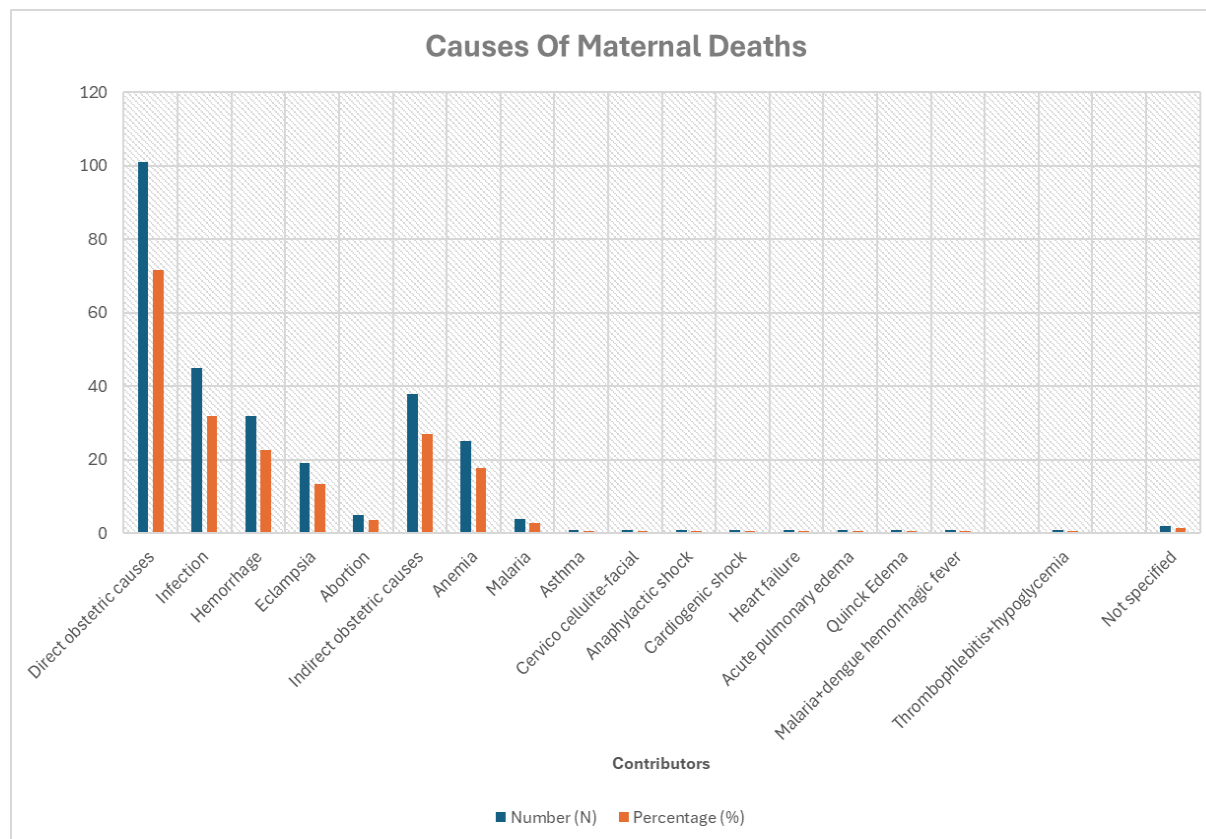

Chart 2 (2D Column Chart)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6328931/>

Citation: Zamané, H., Sow, H. E., Kain, D. P., Bicaba, B. W., Kiemtoré, S., Yameogo, I., Bonané-Thieba, B., & Sawadogo, M. (2018). Maternal Mortality at the Dori Regional Hospital in Northern Burkina Faso, 2014-2016. *International Journal of MCH and AIDS*, 7(2), 235.
<https://doi.org/10.21106/ijma263>

Causes	Number (N)	Percentage (%)
Direct obstetric causes	101	71.6
Infection	45	31.9
Hemorrhage	32	22.7
Eclampsia	19	13.5
Abortion	5	3.5
Indirect obstetric causes	38	27
Anemia	25	17.8
Malaria	4	2.9
Asthma	1	0.7
Cervico cellulite-facial	1	0.7
Anaphylactic shock	1	0.7
Cardiogenic shock	1	0.7
Heart failure	1	0.7
Acute pulmonary edema	1	0.7
Quinck Edema	1	0.7
Malaria+dengue hemorrhagic fever	1	0.7
Thrombophlebitis+hypoglycemia	1	0.7
Not specified	2	1.4

Data sourced from Table 4, as referenced above, indicates that unaddressed health issues stemming from the challenges outlined in the problem statement have significantly contributed to maternal mortality rates in the Sahel region.

7. What are your action items from the team meeting? (what do you need to do before the next meeting?)

We agreed to think of an app solution/ platform for our problem statement.

8. Provide the data visualizations that you worked on with your team, and in 2 - 3 sentences write your analysis of each visualization.

9. Write a reflection on your experience and your team's effectiveness so far. Be sure to include:

1. What is working well with your team?

We are collaborating well and there are no communication barriers.

2. What is one good thing that happened during your team meeting?

We all were on time and cooperative and our meeting was very productive

3. What is one thing your team could do better in the next meeting?

It was a good start actually, and I think being organized and cooperative as we are will make the next meetings productive too.

4. Are you experiencing any frustrations with your team? If yes, what can you personally do to lessen the frustration?

No, not at all.

5. How would you rate your ability to communicate with your team members on a scale of 1 to 4? (1=extremely poor and 4=excellent)

4

6. What is your biggest concern about working with your team during Month 2?

Being late is my biggest concern

7. How might you address that concern as a team?

We can be organized and scheduled to avoid any delays.

8. What is one hope you have for your team during Month 2?

I hope we all can challenge ourselves and #do_hard_things together .. I hope we can succeed in our learning journey and our lives.

9. Overall, how satisfied are you with how well your team is working together? (On a scale of 1 to 4, with 1=extremely poor and 4=excellent)
