In 3-5 sentences, please share an overview of your and/or your team's process of creating wireframes or a prototype. What was the most challenging thing about the process of creating your wireframes or prototype? What did you learn?

Each member of the team made his own wireframe design for the application, then we shared all our designs and decided which is the best design and the elements to be included. After that, we assigned 3 members to work together on the final design. The most challenging thing for me was that I was using a new design platform that I didn't have experience with. The second challenge was the brainstorming phase to choose the final design. I learned to use the platform which will help me in the future, I learned to visualise my ideas, and also brainstorming with the team taught me collaborative thinking.

Please briefly describe your role in helping create the slide deck:

I have reviewed the slides, and gave my feedback to the team on the modifications that can be made.

Please answer the following questions.

A. What is working well with your team?

We were working collaboratively and everyone did his task as planned.

B. What is one good thing that happened during your team meeting?

The meeting was productive and we built more rapport with each other.

C. What is one thing your team could do better in the next meeting?

Nothing on top of my mind, I see that we are doing well. We need to keep it up and focus well.

D. Are you experiencing any concerns or frustrations with your team? If yes, what can you personally do to lessen the concern/frustration?

No

E. How would you rate your ability to communicate with your team members on a scale of 1 to 4? (1=extremely poor and 4=excellent)

4

F. Overall, how satisfied are you with how well your team is working together? (On a scale of 1 to 4, with 1=extremely poor and 4=excellent)

4

G. Is there anything else you'd like to share about your team and their process?

No
